Yes, they did detect odors and it was associated with the standard stink of the site. Again, I have gotten calls from Ms. Jones about the stink from some of our activities.

[Try this:](#)

- The City has been sending investigators to the site each day over the last month to monitor for odors coming off of the site. These investigators inform the EPA On-Scene Coordinator of any detected odors. This information is used to complement EPA monitoring information and is used to help evaluate sources of existing or operational related odors.
